There is probably an known way of fish extehing with which the Chinese are not familiar, and there are still some novelties to westerners in this ancient civilization. A very peculiar method is practiced by the natives on the Yungtere river, opposite to Techang, vizthat of employing the common ofter to drag the finny denizers of the muddy deep from their otherwise impregnable retreats under the high, overhanging

From a cleft in the rock strong but slep ler bamboo rods project out over the water, to the extremity of each which is attached to an otter by an iron chain fastened to crossed leather thongs round the animal's chest and immediately behand the shoulders. When resting on the bamboos, curled or doubled up, they look inanimate, and would be taken for dried skins hanging in the sun, but when required for use they are aroused to a great state of activity.

A large net is prepared with leaden weights and so sunk as to cover a conaiderable space of the bottom, the otter being placed under it before lowering. When once down the slaughter begins, and all unfortunate idlers are nabbed and rendered helpless by the sharp teeth f the savage animal. After a few min utes have passed the whole contrivance is hoisted up, the otter is chained to the rod, and the fish put into baskets.

Some of the otters are not in use, and it is a curious sight to watch them gam. boling about as far as the iron chain will allow, splashing and diving and fighting each other.—[American Angler.

DE BUTTAL MEDICAL Association:

ORNICE MEDICAL Association:

ORNICE MEDICAL have been troubled with rheumatism for two years. I tried all the heat edvertised oils and liniments, and many first-class physicians without relief. The last doctor I visited recommended Dr. Russi's "Bison-Bloot Oil." I purchased a large bottle for fifty cents, and applied it. In two hours I was relieved and now I am entirely well. Its effects are wonderful and I believe it the only thing in the world which will cure rheumatism.

Truly yours.
